- A minimum base of 30 is considered statistically stable to draw conclusions.
- For bases that are less than 30 (shaded in gray), if applicable, a notation is made that results must be read with caution due to high margin of error. Results for bases less than 30 shall be indicative only.
- Significance testing in data tables is denoted by green (as significantly higher vs. total) and pink (as significantly lower vs. total).
- No significance testing shall be applied for segments with bases less than 30.
- Any minor discrepancies are due to rounding off. Exact figures (e.g., with decimals) are to be provided in the raw data / Tableau dashboard by request.

SUMMARY AND WAYS MOVING FORWARD

- Overall, there has been a good rating for some Cabinet Departments e.g. DSWD, DepEd, DILG.
- The ratings of the Cabinet Members could still improve given that the Cabinet shows more awareness of how they could improve the lives of the Filipino people and what reforms could greatly impact it.
